POWERLIFTING FOR SOFIA

Sofia is 15 years old and has Dravet Syndrome, caused by a rare gene mutation. Dravet Syndrome is a rare, severe Epilepsy with frequent and/or prolonged seizures. She is nonverbal and nonmobile, but despite this, one of the happiest children you will ever meet. She loves watching Princess Sofia and playing with her new little brother. She attends Meeting Street School, which she enjoys enormously. We are hoping to provide Sophia with her own Wheelchair.
